

Liquid Foods Solutions

PROCESSING & PACKAGING **PERFORMANCE**
FOR LIQUID FOODS MANUFACTURERS

LIQUID FOODS SOLUTIONS

ProMach excels at solving the unique challenges of processing and packaging soups, condiments, dairy, plant-based alternatives, prepared foods, edible oils, sauces, dressings and marinades, nut butters, and jams and jellies for the Liquid Foods market.

We are flavor obsessed, and our solutions enhance the shelf life of food while maintaining product quality and allow manufacturers to adapt to consumer preferences and offer liquid food in every package and shape.

Simply stated, ProMach offers the broadest portfolio of liquid foods solutions in the world.

Whether you are a start-up or a well-established liquid food products manufacturer, ProMach delivers customized solutions that will make you profitable today—and tomorrow. ProMach is a global provider of best-in-class solutions for stand-alone machines, cellular systems, turnkey lines, integrating both ProMach and non-ProMach content, and digital intelligence.

Our integrated, in-house design-build approach allows you to realize the benefits of greater speed to market, cost efficiencies, and a single source of accountability.

PROCESS TECHNOLOGY

Precise Batch and process control technologies that include ESL/aseptic and efficient CIP systems for mixing and blending, powder dissolving, heating and cooling, homogenization, separation, and cleaning and sanitizing

- Multi-stream continuous inline blending with zero button changeover technology.
- Mass meter-based system ensures consistency.
- Ergonomic dry ingredient addition into a batch of product.
- Customized instantaneous liquefaction systems.
- Integrated product recovery systems to reduce waste and waste water for rapid ROI.

SUPPORTING PROMACH BRANDS

BOTTLING & CAPPING

Handling of containers going into and coming out of filling operations with automated solutions to apply caps and closures and create multi-packed products.

- Closure equipment options to complement every filling need, including inline and rotary screw-on and roll-on aluminum capping, snap-on and die-cut or rollstock lidding.
- Proven linear and innovative robotic unscrambling/orienting solutions for the largest range of plastic containers, ranging in size from 10 mL to 9.5 L.
- Capping systems deliver reliable sealing performance across liquid foods of differing viscosities, maintaining closure integrity to prevent product leakage, separation, or spoilage.

SUPPORTING PROMACH BRANDS

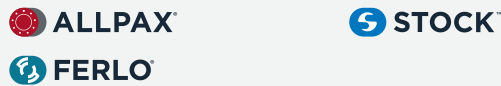

BATCH RETORTING, COOKING, & STERILIZING

Complete retort room solutions for in-container sterilizing of hermetically sealed products in cans, glass or plastic bottles and pouches to render them shelf-stable, as well as thermally process any type of shelf-stable, ready-to-eat or serve food or beverage product packaged in any type of container, at any speed.

- The only wet food batch retort equipment manufacturer in the world that provides in-house designed and built, turnkey systems 100% supplied and supported by one company.
- The only company that offers 6 different retort process types (saturated steam, steam-air, cascade/shower, water spray, water immersion, and ImmersaFlow®) and 5 different agitation models to meet nearly any type of application.
- ImmersaFlow®, a patented static in-container thermal retort process technology, offers 30–40% reduction in come-up and cool time (compared to competitor retort processes).

SUPPORTING PROMACH BRANDS

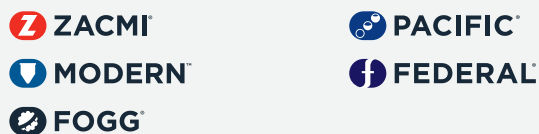

FILLING

Complete range of solutions that can fill liquid and viscous liquid food into rigid containers or flexible packaging.

- Widest range of filling capabilities—from 1/4 oz condiment cups to plastic jars and cans, all the way up to pails and jug-in-box (JIB) formats—supported by matching seaming, capping, and lidding systems.
- The most comprehensive range of keystone filling technologies—including level, net weight, piston and time pressure volumetric, and flow meter systems—that ensure precise and efficient solutions for any liquid filling application.
- ESL sanitary filling technology achieves a 99.9%–99.99999% reduction in microorganisms to extend product shelf life, ensure food safety, and maintain optimal freshness.
- Patented filler design eliminates dynamic seals in piston and valves to ensure repeatable fill displacement.
- Online continuous can monitoring controls that checks can seaming performance in real time to immediately reject cans with damaged flanges or presence of a foreign body between can body and lid.

SUPPORTING PROMACH BRANDS

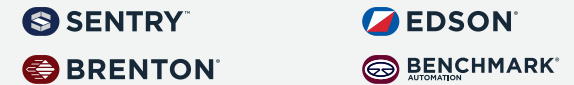

CONTAINER HANDLING & CONVEYING

Broad range of machinery and accessories for moving products and packages through a line, from corrugate de-strapping, depalletizing, conveyors, accumulators, and lane dividers.

- Robotic depalletizing full layers of product up to 500 pounds with superior results for empty or full bulk items, bags, cans, bottles, jars, or jugs.
- High or low level depalletizing designed to receive bulk loads of empty glass, PET, or aluminum containers on wooden or plastic pallets, and transfer each layer one at a time.
- Robotic infeed de-strapping technology automates waste management and eliminates labor and prepares stacks of cases for a wide variety of packaging machines—including applications using cans, buckets, KDFs, and more.

SUPPORTING PROMACH BRANDS

FLEXIBLE PACKAGING

Forming, filling, sealing and wrapping products using flexible materials for nearly any product type, size/weight parameters, and speed.

- The only Vertical-Form-Fill-Seal manufacturer to offer automatic changeover for consistent, repeatable, and efficient setup to limit downtime.
- Unique pillow bag liquid module eliminates air pockets for zero headspace and improves product shelf life.
- Capability to run multiple product formats on the same machine for multiple selling points, including convenience, retail, and club.
- Vertically integrated stick pack and sachet filling equipment with speeds from 40 to 600 sticks per minute.
- Horizontal-Form-Fill-Seal solutions for liquids, including demanding hot-fill, corrosive, and foamy products.
- Horizontal pouch machines feature Ultra-Clean and sterile designs, fast recipe-driven changeovers, and automatic roll joining ensuring hygienic and efficient operation.

SUPPORTING PROMACH BRANDS

DECORATIVE LABELING

The most comprehensive and advanced portfolio of labeling and shrink sleeve solutions for various types, shapes, and sizes of products and packaging.

- Advanced pressure-sensitive, hot melt, cold glue, roll-fed, cut and stack solutions for prime labeling to improve shelf appeal, emphasize new features, highlight nutrition facts, introduce new SKUs, enhance security, and more.
- Integrated shrink sleeve labeling systems—with tamper-evident bands, multi-pack applicators, and heat tunnels—deliver full-coverage decoration, product protection, and a more efficient packaging process.

SUPPORTING PROMACH BRANDS

CARTONING, CASE FORMING & PACKING, AND TRAY SHRINK

Standard and configurable solutions to form cases, create chip board wrap arounds or sleeves, load product into trays, cases or cartons, and/or shrink wrap trayed or loose product.

- Case packers for side or horizontal load, top load, robotic, bottom load, and drop case packers.
- Patented pin & dome case stabilizing technology precisely opens and squares each case, easily adjusted for various sizes.
- Proprietary and specialized vision guided robotic solutions pick-and-place a variety of primary packages into cases or trays, eliminating the need for complex infeed systems.
- Vertical shrink wrap systems that integrate seamlessly in line with a filler to provide speed and versatility.
- Pick and place products from 1 oz. to 50 lbs. into cases or trays—up with standard configurations and virtually limitless speeds with non-standard configurations.

SUPPORTING PROMACH BRANDS

LABELING & CODING

Single-source provider of high-quality labeling, coding, and marking systems for applications in primary, secondary, and tertiary packaging.

- 10 label manufacturing facilities strategically located across North America that produce preprinted, blank, shell, and specialty labels near you, reducing shipping cost and time.
- Coding and marking solutions that exceed industry compliance and traceability standards to provide reliable tracking, identification, and product safety.
- High-resolution and precise variable data printing and late-stage customization for barcodes, lot numbers, and expiration dates, eliminating the need for pre-printed labels or packaging.
- Industry's fastest, all-electric, case and tray printer applicator that includes zero downtime options for even greater production line efficiency.

SUPPORTING PROMACH BRANDS

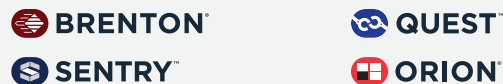

PALLETIZING & STRETCH WRAPPING

Robotic, conventional, and hybrid palletizing for low to high speeds ranging from simple 1 in/1 out systems to complex multiple robot solutions. Complete any packaging line with a portable, semi-automatic to fully automatic pallet stretch wrapping machine.

- Bulk, case, and robotic depalletizers/palletizers for all products, as well as total control systems.
- Pallet building software applications.
- Patented, proprietary pallet building software allows operators to easily design and produce pallet patterns without the need for an onsite programmer.
- Patented stretch wrapper film carriage provides 260% pre-stretch on each roll resulting in lower material costs and supports sustainability initiatives.

SUPPORTING PROMACH BRANDS

SYSTEMS SOLUTIONS

Unparalleled experience integrating and optimizing turnkey packaging lines with more than 2,600 projects completed.

- Overall equipment effectiveness (OEE) audits and improvement plans, Front-End Engineering (FEE) studies, design-build custom packaging equipment, and engineering based integration solutions.
- Software-based production line data collection, monitoring and reporting.
- Turnkey line control systems design, engineering, manufacturing and start-up for all system components and products.

SUPPORTING PROMACH BRANDS

SOUPERIOR SOLUTIONS

Processing and packaging solutions for thin, thick, and chunky soups.

As consumer preferences evolve, we support the soup industry in staying ahead of emerging trends.

Our processing technologies accommodate the shift toward health-conscious eating and novel flavors through the inclusion of new ingredients. Extensive labeling and coding solutions meet the demand for clean, transparent labeling to build trust and differentiate products.

From traditional metal cans and glass jars to flexible pouches and pails for foodservice, we offer end-to-end solutions that ensure consistency, efficiency, and adaptability to changing recipes and formats.

PROMACH MEANS PERFORMANCE

Our best-in-class soup solutions are engineered to perform and provide you with reliable, worry-free operation.

COMPLIMENTS TO YOUR **CONDIMENTS**

Processing and packaging solutions for condiments like BBQ, mustards, ketchup, mayonnaise, and specialty sauces.

To help condiment manufacturers remain competitive, we enable brands to innovate with flavor and create distinctive products that resonate with today's adventurous and health-conscious consumers.

Our solutions support product line expansion and elevate brand equity across formats. Whether filling consumer-ready bottles and jars or scaling up production for foodservice in bulk formats, our systems are designed to protect flavor integrity and support high-throughput efficiency.

LEGENDAIRY PACKAGING SOLUTIONS

Processing and packaging solutions for dairy products like milk, yogurt, sour cream, cottage cheese, pudding and dairy-alternatives in liquid to semi-solid forms.

With health and wellness shaping consumer purchasing decisions, ProMach equips the dairy industry with technologies that respond to growing demand for functional and innovative products.

Our solutions allow for the incorporation of dietary-specific ingredients—without compromising taste—and meet market surges for limited-edition launches and convenience, on-the-go formats.

From shelf stable packaging to single-serve cups and tubes to larger-scale foodservice pails, we offer the flexibility and quality control needed to support a broad spectrum of dairy applications.

PLANT-BASED ALTERNATIVES

Processing and packaging solutions for plant-based alternative products like milk, yogurt, cheeses, and dips in liquid to semi-solid forms.

As the plant-based category expands, ProMach helps brands respond to demand for nutritious and innovative options.

Our processing technologies are designed to work with soy, grain, nut, rice, and seed-derived ingredients, supporting formulations that prioritize taste and texture.

We offer end-to-end and shelf stable packaging solutions for plastic cups or tubes for consumers or pails for foodservice that scale with your operation—from ingredient prep to final packaging—while maximizing production and ensuring product quality.

PREPARED TO BE AMAZED

Processing and packaging solutions for prepared foods like potato salad, egg salad, macaroni & cheese, hummus, chili, salsa and dip, and prepared meals in pureed, creamy, and chunky forms

Meeting consumer expectations for health, convenience, and restaurant-quality meals at home is key for the prepared foods category.

Our solutions support the processing and filling of fresh, natural ingredients into ready-to-eat formats that offer speed and satisfaction.

With capabilities suited to diverse meal types and packaging styles such as cups, trays, or cartons, we help you optimize throughput while maintaining product freshness and appeal.

OIL'S WELL THAT ENDS WELL

Processing and packaging solutions for edible oils like canola, olive, vegetable, and flavored oils.

As blended oils and high-volume cooking formats rise in popularity, ProMach helps the edible oils industry respond to growing demand in both consumer and foodservice markets for products packaged in plastic bottles, metal cans, pails or jugs.

Our processing solutions help strike the right balance between taste, nutrition, and cost efficiency.

From precision processing to end-of-line packaging, we enable scalable operations that meet retail and industrial needs alike.

WE HANDLE SAUCE LIKE A BOSS

Processing and packaging solutions for sauces like alfredo, tomato-based, gravy, soy sauce, and hot sauce of varying consistencies.

Flavor-forward and health-conscious consumers are reshaping the sauce industry, and we offer flexible technologies to meet that challenge.

Our systems adapt to reformulated products, accommodate new ingredients, and support a wide range of packaging formats, including plastic jars, metal cans, or pouches for consumers or pails for foodservice.

Whether you're launching new SKUs or increasing production of your core line, we deliver process and packaging solutions that ensure both agility and product quality.

IMPRESSING WITH DRESSINGS & MARINADES

Processing and packaging solutions for dressings and marinades with acidic, savory, creamy, cooked, and fruit bases.

To keep pace with consumers seeking bold flavors and better-for-you ingredients, we provide the dressings and marinades industry with flexible, efficient processing capabilities.

Our systems are engineered to handle a wide range of ingredient profiles—including low-fat, low-sodium, and all-natural recipes—while maintaining throughput and accommodating diverse packaging formats, from plastic bottles and metal cans to sachets and foodservice pails.

Whether you're producing small artisan batches or scaling up for high-volume runs, our solutions help you deliver on both quality and innovation.

PACKAGING PERFORMANCE IS OUR JAM

Processing and packaging solutions for nut butters, jam and jellies varying in smooth, creamy, thick, and chunky textures.

In response to growing demand for more natural products and unique flavor profiles, we help brands in the nut butters, jams, and jellies category meet evolving market expectations.

Our systems support products without added sugars or artificial preservatives and enable unique product experiences across diverse formats such as glass or plastic containers or squeezables for consumers or pails for foodservice.

With a focus on shelf life, package durability and attractive appearance, ProMach helps brands deliver standout products with speed and precision.
